This book is hilarious. It's also fun, well-illustrated, and useful if you're a writer. The tropes in "How to Survive a Horror Movie" are pure gold. I'm still laughing... and taking notes for a ghost story I'm working on.

As a fellow Horror movie junkie I could not wait to get this book. I was not disappointed. The way Seth Grahame-Smith transforms a movie genre into a physical space (The Terrorverse) is just non stop hilarious. The writing style is epic with great pictures to illustrate what's being said and has been done in movies in the past. Some of it is incredibly gory but hey this is a book about horror movies not kittens (though there is a section about evil cats ;))I also learned about a few horror movies and sub genre's I hadn't heard of before. Hooray for new things right?Grahame-Smith divides the book into section and makes his way through virtually every genre and sub genre of the

horror movie scene. Describing in detail how not to become just another dismembered body in your favorite movie. What is truly unique is how the author seems to pull you into the movies so you really feel like you're suddenly a part of the movies we all loved watching growing up, but then you remember the survival statistics for the characters of this movie and suddenly you are desperate to gobble up all the info to stay alive. Seriously though if you love all things scary and don't just wait for Halloween to roll around once a year to break out the mayhem and frights this book is for you. I laughed my butt off non stop and was sad when I had finished the book. I will definitely be looking into a few other books this author has written.

I was looking for a good read and Seth Grahame-Smith has NEVER disappointed! I know I will definitely read it again!

The book was a fun, light-hearted approach to an amusing subject. For fans of horror movies, this would be a great read. Even for one such as I, who maybe watches one horror movie a year, the humor with which the author recommends survival behavior in different situations was engaging. I recommend it highly as a delightful diversion.

This is a must-have for die hard Horror Movie fans. There were some obvious things in it of course, for example it warned against going to any summer camp as a counselor ((you'd be dead before the night was thru)) or be the macho guy saying he'll kill the undead serial killer who has some kind of homing device embedded in his brain that draws him to the person, and of course is impossible to kill. The movie that made half of it was Friday the 13th and the movie that made the other half was Halloween. The story has a lot of humor in it ((the best is fighting the devil)) and gives a description of the different types of killers. Also in the very back it talks about all of the movies used for the rules and which ones were duds that you shouldn't see. All in all, I would give it an infinite amount of stars if I could. Again, I would get this book for that horror fan on your list christmas list.

Caution, this book may make you laugh out loud... Or wince slightly. Maybe both? On the whole I found this book to be quite entertaining and rather funny in many parts. Basically it's a run-down of all the horror movie clichés and how to avoid them. Moreover, it gives you practical tips on how to survive if you find yourself embroiled in a typical horror movie... The book comes with a foreword by Wes Craven, a healthy dose of humor, is well-illustrated and generally pretty slick. Some sections are definitely funnier than others, so it's a little uneven in that regard. But, I figure you need to have

a few less-funny moments in order to truly appreciate the gut-busting riffs when you run across them. If you like horror, and a little comedy, I'd definitely recommend giving this book a try. Good coffee-table or bathroom reading, if nothing else. Not to be confused with the similarly titled *Horror Movie Survival Guide*.

I first got this book as a birthday gift and got a laugh on every page! It dishes out all the stops for what it means to be in a horror movie, how you know if you're in one, the do's and don'ts of survival, there's even names of lots of great horror movies at the end. There is nothing I didn't like about this book. Nothing is left out information wise and keeps a sense of humor about it. It's serious information with an LOL-able narration. I loved it so much I ordered it to donate to my college's library. HIGHLY recommend this for horror/thriller movie lovers everywhere! :D

This was a great purchase! Really fun to read! Brought back a lot of memories from when I was really in my horror movie phase. I used to love the scream movies and all the somewhat cheesy ones. And this really hit the nail on the head! This basically makes fun at horror movie clichés but takes it to a whole different level. The book is written so you feel as if you are in a horror movie and actually need the pointers....hence the name "how to survive..." I have a very big sense of humor spanning from very shallow and cheap sense to the deep thinkers. And this book lands right in the middle. Even if you're not a horror movie fanatic, this is still a fun book!
