That's Not My Dragon...(Usborne Touchy-Feely Books)

Synopsis

A touchy-feely board book with simple, repetitive text, tactile patches and bold illustrations suitable for babies and toddlers. A little, white mouse appears on every page, for children to spot.

Customer Reviews

"Helps very young children develop language and sensory skills" - Sheffield City Council; "The brilliantly simple concept is a winner with very young children, trusted by parents and still one of the best baby series on the market" - The Bookseller; "A valuable and enjoyable learning tool." - Junior Parenting Magazine; "This range of books is perfect to share with wriggly toddlers. They're bright, bold, interactive and not too long. The latest addition features lots of foxes for little fingers to touch and sure to be another best-seller." - The Sun; "A fantastic range of indestructible chunky board books designed to appeal to inquisitive little fingers" - Mel Harris of Waterstone's

Thus far, I'm calling this the BEST of the series. I have not read all the titles, but over 20 of them are under my belt and looped through my head. DRAGON is definitely my favorite. It includes some of the series more obscure adjectives/textures (opening with "tufty" and closing with "scaly," which I haven't seen in any others) and the dragon on each page is different, which is much more fun than the LION or MONKEY editions. Incidentally, the That's Not My...s are the best and best priced touchy/feely I've been able to find. I initially found them inane, but as I explored the board book genre I quickly reevaluated my first impression. This series incorporates textures other than the standard "soft," "furry/fluffy/dowy" or "silky," which is a welcome change and more of a sensory

experience for the baby. Matthew Van Fleet's books, DOG, CAT, and MOO do surpass That's Not My... but you pay a premium for the quality.

Definitely the best touch and explore board book series that I've been able to find, and this is my favorite so far in the series. More range of body parts and adjectives. These books have great colors and illustrations, fantastic and smooth integration of the tactile components, and an adorable storyline. My son is 8 months old and he loves these books -- he touches all the pages, and gets very excited when we get to the last page and the mouse finds her dragon. Other great entries in the series: Dinosaur & Hedgehog.

We love these books and purchased our first one for our wee bout (that's not my tiger) when he was 3 months old. The bright colour and clear pictures are wonderful for very small children and you can help them touch the tactile patches. As they get older they very quickly learn how to identify and touch the patches themselves. My son loved this book, he knew which bits to touch straight away and will sit totally engrossed when we read this to him. At 6 months he is able to hit all of the tactile spots himself. As with all books in this series, the illustrations are bright, clear and uncluttered and the story takes the expected form of that's not my xxxxx it's xxxxx are too xxxxx. This is now my son's favourite book, he loves the first page with the tufty ears and will spend ages looking at this. Definitely an ideal book for growing young minds.

I bought this after my son fell in love with a different touch & feel book. It's nice but a little more cheaply made than the other one we have. I do like that there are pages with knobbly, prickly, and scaly sensations, rather than just the "fluffy" ones that so many seem to resort to. I also love the dragon theme.

Our daughter loves this book. We have a few others from our son and she likes them too. Just a fun book concept for little ones to start the reading process early.

Great book for 9 month olds and older. Kids will love the textures and pictures throughout the book. Makes a great 1st Birthday gift.

I really liked this book, but my niece who is 3 did not. I think a few of the pages should have better tactile experience.

Love this book series!! Usborne's "That's Not My..." series is perfect for babies. My 3 month old is not yet feeling the patches, but the bright colors really grab his attention. We have a few books from this series and this is one of my favorites. A lot of the books repeat themselves with the softer textures, but this has a broader range of textures, like "scaly", etc. I think this is definitely worth adding to your little one's library!
