The Glass Universe

Synopsis

Number one New York Times best-selling author Dava Sobel returns with a captivating, little-known true story of women in science. In the mid-19th century, the Harvard College Observatory began employing women as calculators, or 'human computers', to interpret the observations their male counterparts made via telescope each night. As photography transformed the practice of astronomy, the women turned to studying images of the stars captured on glass photographic plates, making extraordinary discoveries that attracted worldwide acclaim. They helped discern what the stars were made of, divided them into meaningful categories for further research, and even found a way to measure distances across space by starlight. Elegantly written and enriched by excerpts from letters, diaries, and memoirs, *The Glass Universe* is the hidden history of a group of remarkable women whose vital contributions to the burgeoning field of astronomy forever changed our understanding of the stars and our place in the universe.

Book Information

Audible Audio Edition

Listening Length: 11 hours and 52 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: HarperCollins Publishers Limited

Audible.com Release Date: December 6, 2016

Language: English

ASIN: B01IRHLS12

Best Sellers Rank: #86 in Books > Audible Audiobooks > Science > Astronomy #2928
in Books > Science & Math > Astronomy & Space Science > Astronomy

Customer Reviews

I've known about the Harvard women computers for a long time. Was fun to finally learn the true story behind them. Excellent.

Excellent book
