Customer Reviews

I think this book would be great for kids, or anyone interested in learning more about snakes. Inside, you will find many interesting facts about snakes, including basic information as well as interesting trivia you likely weren't aware of. I was actually very surprised by some of these facts. The book

starts by giving some general facts about snakes, followed by sections devoted solely to the most popular and well-known snake varieties. The book is illustrated throughout. I recommend this book to parents who want to encourage their kids to be inspired by nature. Snakes are a very important part of our world. From the various types of venom they produce, to the way they move, snakes continue to inspire technological advancements. And their danger and beauty has been appreciated by artists and nature-lovers since the beginning of time. Give your children the opportunity to be inspired by these modern-day dragons. The only thing I didn't like about this book was some of the formatting. I think the facts are supposed to be numbered, but they all start with a '1'. It wasn't a big deal for me, but it's something that could be improved in future editions. I received this book for free through an voucher program.

My great nephew and I love to read together. He is five and absolutely adores learning books and quoting facts, already! I figured this series of 101 Super Fun Facts and Amazing Pictures books would be an excellent choice for us to enjoy together. I ordered the eBooks on each of these subjects: Snakes, Penguins, Sea Turtles, Spiders, Dolphins, and Dinosaurs. He loved each of these books. I thought we would just sit down and read all of these books, all in a row, but these are substantial books, so we did two per sitting/day and this worked out well for his age. Despite them being long books with a lot of information for a 5-year-old, he enjoyed them each and they held his interest the whole time, even with a bit of fidgetiness toward the end. He loved choosing the order we read them in and enjoyed each of the subjects equally as much as the others. These books could be written just for him and his interests. There is a lot of information in them and we both learned a lot. I can definitely see us revisiting each of these books over and over in the future, soaking up a little more of that info each time, which is excellent. I have a feeling he will be quoting the facts he learned in these books to his sisters and parents quite a bit. I received these eBooks free in exchange for writing an honest and unbiased review. Again, these are each great books, full of fun and interesting information. We would both recommend them for 5-year-olds and above, in general, depending on the child's interest level. I take writing product reviews very seriously, as I rely heavily on reviews of others when considering purchases. I hope this review has been helpful to you.

This ebook is offered for free right now so at that price it's definitely a 5 star review.But even if it wasn't, it would be at least a 4 star reviewing depending on the price. There are some cool pictures of snakes in the book but not as many pictures as maybe I would like. The pictures are captioned

well. I really like this book because it's just like the title says...101 Super Fun Facts. My kids love Fun Fact books. The book is broken down into about 13 chapters. You can click "look inside" on the main product page on and see the first few pages of the book to see the different chapters. 10 of the chapters talk about different kinds of snakes including the anaconda, boa constrictor, cobra, python and rattlesnake. There are about 9 facts related to each snake. One thing I don't like about this book is that the numbering is off. Instead of being numbered from 1 -101 each fact is numbered 1. There are other books in this series by Janet Evans that are worth looking at as well. At least one of those books has their facts numbered per each chapter (with some wonkiness within a chapter where the numbering starts over. The numbering system that makes the most sense to me is how 1 - 101 because it's nice to keep track of how many facts we've already read. Is this a big deal? It's distracting for sure but since the ebook was free it's not a huge deal. So all in all a good book especially for free. Check out other 101 Fun Fact books by Janet Evans. Seems many of them are offered for free and these are great ebooks to keep on your device for kids of all ages.***** I received this book for free in exchange for my honest review. *****

This was a nice little ebook. I got this and a few other ebooks for free in exchange for a review. I didn't have to pay for them instead they wanted my opinion of the books. These are not for younger children. I really enjoyed reading it. But the kids were scared due to the pictures of the snakes and some of the details about them. I have younger children with extremely vivid imaginations and when they found out that some of the poisonous snakes are in the US they freaked out a little bit. I may be snake checking under their beds for a few weeks. I have to say though that the spider book scared them even more so. I think this series of ebooks are great though and I will be reading this to them again, Maybe with the little kids not in the room. This is an excellent addition to our home school curriculum and I would recommend it to a family with bigger kids.
