Understanding Spanish Conversation: Learn The Words, Phrases And Grammar Spanish Speakers Use Everyday And Quickly Become One Yourself!

Synopsis

Have you spent a great deal of time learning Spanish only to find that you can't converse in it? Have you been looking for something to help you break out of basic or tourist Spanish? Then look no further! In this book, you will learn how to take the concepts that we use in everyday English conversation and convey them in Spanish. You will learn the words, phrases, and grammar necessary to start speaking Spanish more naturally, the way the natives speak. By learning to speak more naturally, you will more easily be able to engage Spanish speakers in conversation, leading to immersion, which is the absolute best way to learn a language hands down. Everything in this book is written to help you learn difficult Spanish concepts, in a way that makes the most sense to an English speaker. As a native English speaker myself, I have experienced the same frustrations that many of you may now be going through. This book is written to end those frustrations right now. This book doesn't teach academic Spanish and will not overwhelm you with complicated rules of grammar. I just make everything as simple as possible so that you can take what you learn from this book and use it right away. Buy it now and start improving your Spanish immediately!

Teaching > Studying & Workbooks

Customer Reviews

I find this to be a very useful as I try to expand my conversational skills. I will keep referring back to it until I've practiced enough for it all to become ingrained. I am at an intermediate level of language acquisition and I think it is just right for me, if that helps anyone else to decide.

Nice review of important words and phrases.

As advertised, helpful.

Definitely a great book to read through and then refer back to time and time again. It's very beneficial for people like me who travel a lot and also work with families whose first language is Spanish. It's a very helpful book and I highly recommend it!

good

Nice

My wife and I have been studying Spanish for about five months. I picked up this little book a few months ago, and I consult it quite often. It is very well done. It fills in the gaps that a standard grammar book has. It explains very clearly when to use a certain verb as opposed to another and gives lots of examples. There is often more than one way to say something in Spanish, and this book makes it clear when one way should be used as opposed to another. It is like no other Spanish book we have, and we have lots of Spanish books. I am very glad that I found it. The price is ridiculously low, I think, considering the great advice the author gives in the book. I wish he would do one for the French language also, which is a language I have a much harder time with than Spanish.

The content is excellent. The audio reader does not have an authentic Spanish pronunciation.
