Customer Reviews

Grade 4-6-A brief but attractive overview. An introductory chapter defines terms such as sedimentary rock, relative time vs. absolute age, and the different kinds of fossils. Other chapters provide examples of remains from the Paleozoic to the Cenozoic eras and mention early ocean animals, some of the newer dinosaur discoveries, and ancient mammals. In covering the dinosaur finds, the author defines and describes the creature and notes where the fossils were discovered (but not always when), and why the discovery is important. The somewhat dry text is accompanied by above-average full-color photographs. An adequate, current bibliography with Internet resources is included. Kathryn Kosiorek, Cuyahoga County Public Library, Brooklyn, OH Copyright 1999 Reed Business Information, Inc.
