Customer Reviews

This book is fun, you have to find where the words are and a lot of them my granddaughter can already read. It is just the type of book that makes my kindergartener laugh, while she is learning, both about how plants grow and also to read better. They are planting seeds in school right now and are going to eat a salad made from the lettuce they have grown. I would recommend this book to all the children in all 6 kindergarten classes at her school!

I love the illustrations and the story. This is a charming book. Such a perfect story for seasons, plants or life's little lessons if you want to dive deeper.

My 5 year old loved Arlo's garden adventures. It was a very good book for exploring the garden. Excellent book.

A fun "roll" through the garden

Used as an example to introduce plant life cycles. Great conversation starter. Artwork is absolutely beautiful. Kids loved reading this.

It is very well written with each page illustrated so beautifully! It makes you turn the pages with great expectations!!

Great story and illustrations. My daughter plans to read it to her Kindergartner's this year when they plant seeds as part of a science unit.

Cute little story about a pea on an adventure, that grows up to be something great! The kids loved it! Nuff said! Lol
