Age Range: 5 - 9 years

Grade Level: Kindergarten - 4

## Customer Reviews

This was a hit on a recent family beach trip. My 2-year old and her older cousins loved using these stickers in the book to make pictures, as well as to put in the book (the intended purpose). There were tons of stickers - enough to keep them busy each evening for a week long trip. I would highly recommend this book. It was worth the cost for the great stickers alone. The book is an added bonus.

I bought this book to keep my 7-yr-old daughter busy on a cross-country flight. She LOVED it. She read every word, placed every sticker where it belonged, and enjoyed every minute of it. I had lots of other things in her activity bag -- electronic game, color book, white board, books to read. This sticker book is what she spent the majority of her time on. Even though all the stickers are used now, she still enjoys looking over it. Beautiful color photos and lots of interesting facts about sea life,

beaches, etc.

My four year old received this for Christmas. He has placed every sticker in the correct spot and still has plenty of play stickers left. We read it together, and he has memorized almost everything included in this book. I learned more than a few things too! He looks for it every day, and has flipped through it so much that the pages are worn, and we have taped the edges of almost every page to keep it from ripping. Our two year old was able to help with it as well. Highly, highly recommend!

Just fine shipping. Nice ocean life sticker book. I recommend this item!

My 5-year-old loves this book! It is a great "quiet time" activity! We take it to church for him to do while we are listening to the sermon --keeps his attention and helps him stay quiet for the whole time! The colors and quality of this book are great!

It is a great book. A little pricey but a good buy for the money. The pictures are great but the division of the stickers a bit difficult to follow for my kids (6 and 3). Other sticker books divide the stickers up into sections to help you know which ones go where. This book does not even follow a chronological account of the stickers but seems to stick them in the back of the book on the page where ever it best fit, to utilize the page the best. Confusing.

This has been a wonderful science education for my 1st grader. He loves putting on the stickers and there is an amazing number of facts in the "encyclopedia" pages, plus pages to make ocean scenes with extra stickers. The publisher could improve this book by adding page numbers to the sticker pages so that the stickers for a given page are easier to find, but overall we have loved using this book together.

I've bought several of these sticker books in various themes to keep my kids quiet and entertained during church. They work like a charm. The stickers have great variety and are plentiful, beautiful, and colorful. My kids, who are ages 2 1/2 and 3 1/2, love finding out where some of the stickers go and sticking the rest on the extra pages provided for random stickerness. Great product, would recommend to anyone.
