Customer Reviews

Melissa-Sue John is a mother of two and a psychologist on a mission to increase literacy and Science, technology, engineering, art, and math (STEAM) appreciation. As such she began to write children's literature with diverse characters with the aim of increasing knowledge of STEAM and opportunities for youth to display their talents.

An interesting easy read. And what is so amazing is that all rainbow kids are in it. I love the diversity, children with different color, girls and boys and every single one can become everything. The illustrations are for me THE reason to show this book to as much children as possible.

Great read for any age.

As expected. Very informative and complete! Love the diverse illustrations.

A great book for children to gain insight on the various occupations. What I love about it most is the diversity that is captured throughout the book. Easy read and informative.

Great book!! I love the diverse characters. It really gives children insight to so many different occupations and gives the opportunity for the parent and child to talk about their future ambitions.

IT READS well MY KIDS LOVE IT FUN AND INFORMATIVE READ FOR THE ENTIRE family I WOULD RECOMMEND TO OTHERS

Great book

Great and interesting read for 21st century learners given relatively recent trends in contemporary society. This book has given children a great way to role play and develop an awareness of the roles adults play and some consciousness of who they can be. My son loves it and I have to read and reread it over and over for him. I now know it by heart! I would recommend every parent to buy.
