Age Range: 5 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Kindergarten-Grade 3--This inviting, oversized book lives up to its subtitle. The large watercolor pictures, peopled by children of various ethnic backgrounds, make it a perfect book for classroom sharing. Gibbons discusses the parts of the tree and their functions, types of fruits and seeds, kinds of bark, and uses for trees. She includes a discussion of photosynthesis and gives directions for students to make their own tree identification books. Relevant terms are highlighted in the text and identified in the illustrations. It's a good book to team with Diane Burns's *Trees, Leaves, and Bark* (NorthWord, 1995; o.p.) and Arthur Dorros's *A Tree Is Growing* (Scholastic, 1997). Jean Lowery, Bishop Woods Elementary School, New Haven, CT Copyright 2002 Cahners Business Information, Inc.

Ages 4-8. In this large-format guide, Gibbons discusses the parts of a tree and their functions, the growth of trees, and the different types of trees. She introduces topics such as photosynthesis and

the meaning of terms such as phloem and cambium. In the almost wordless section on identification, the shapes of 15 different trees are shown alongside close-ups of their leaves and bark. The book closes with a discussion of how trees are useful to people, animals, and the environment, and directions for making a tree identification book. The bright watercolor illustrations show cheerful children and adults observing, planting, using, and enjoying many kinds of trees. In this simple, informative book, Gibbons provides a basic guide that is sure to please parents and teachers as well as children. Carolyn Phelan Copyright © American Library Association. Another wonderful book by Gail Gibbons! I used this with my preschoolers for our planting unit.

WAS A GREAT BOOK FOR OUR SON. HAVE NOW DONATED TO HIS SCHOOL FOR THE YOUNGER KIDS.

I ordered this book sight unseen for my three year old granddaughter because it is her favorite book at the public library. I was pleasantly surprised when it arrived because of its very good content. I am a retired science teacher and taught a unit on trees and leaves for many years, so I've seen a lot of mediocre texts and classification books. When my granddaughter opened the book on Christmas morning, you should have seen her face; she obviously has good taste in non-fiction books!

This is a good kid-level book about trees. The pictures are lovely and it's easy to understand- even I learned a few new things! It's a rather "involved" book in that it may be better for a classroom or reference than a bedtime book, but it's great none-the-less!

We ordered one for each child in first grade to go along with the Reading Rockets program for Adventure Bags. They were delivered quickly and they were so great for first graders!

I love this book and learned so much about trees. Did I say that i'm an adult although this book was purchased for a child. It's really not for the very young but for an older child 7 or older it's perfect. Excellent information

Perfect book to learn about trees. It answers all the basic questions kids have about how trees grow and has great illustrations.

I got this for a little girl who is sharing my love for trees. It's a little simple but she loves it.
