This is a very colorful, visually stimulating introduction to volcanoes and earthquakes. It was a gift for an 8 year old nephew and he seemed to appreciate it a lot. It would be appropriate for kids from 4-10, depending on the kid.

This was a gift for my son's 5th grade science class. His teacher raved about the illustrations! It has become a wonderful addition to their class!

My pre-school aged, volcano enthusiast loves this book. It has great pictures and lots of facts for us to learn.

Bought for my volcano and lava obsessed preschooler. Has spawned a new obsession with these nat-geo books and what could be more wonderful? Educational, yet fun, with clear pictures. Very good quality printing as well, which is a plus
