Spanish For The Busy Medical Professional

Synopsis

Learn to communicate effectively with your Spanish speaking patients and their families in just five hours! Have you always wanted to learn Spanish but never found the time or the right teacher? Are you having trouble communicating with your Spanish speaking patients? Did you study Spanish in school, including medical school, but find yourself unable to construct even simple sentences in Spanish? This book is for doctors, nurses, emergency medical personnel, and all medical professionals in need of a Spanish beginners or refresher course. Due to our unique method of teaching, you will be amazed at how much Spanish you will learn and retain in just five hours! What makes this Spanish course special? Our breakthrough method allows you to retain most if not all of what you learn and immediately put it to use. The key is interactivity: instead of making you repeat words and sentences, you are encouraged to think and apply what you learned. Using the words and concepts you learn throughout the course, you will build Spanish sentences and translate Spanish sentences into English right from the start. The course also makes use of the many similarities between English and Spanish, so you can associate new Spanish words with English words you already know. You'll learn relevant words and sentences that you can put to use immediately. This will allow you to reinforce what you've learned through real life practice and motivate you to complete the course. This course only takes about five hours to complete. Many people buy expensive Spanish courses and never find the time to complete the course. But you should be able to find five hours. Even if you only study for half an hour each day, you'll be done in a little more than a week! Learning should be fun and rewarding. It is hard to describe the pleasure you experience when you manage to construct complete sentences in Spanish after just half an hour into the course. In addition, the course is peppered with quotes and anecdotes, to help keep the learning fun and exciting.

Best Sellers Rank: #3 in Books > Audible Audiobooks > Language Instruction > Spanish #497 in Books > Audible Audiobooks > Health, Mind & Body #2733 in Books > Health, Fitness & Dieting

Customer Reviews

i got this before heading to mexico city for three months to help with a humanitarian aid group. the learning method was new to me, (ive tried other methods) this was the easiest and most natural learning method for me. i also didnt have to spend as much time as i initially thought i would

Off to Latin America for a summer internship working with disadvantaged communities in need of proper medical care. Don't have a lot of time to spare to learn a language yet this really has me going with confidence. Great idea and format - delivers what it describes as its purpose. I recommend this

love this book it is very basic and the author make it seem easy to remember phrases and words

Enjoyed the book. Nice, quick, and memorable. Good stepping stone for more advanced learning in medical Spanish. Won't be expert at end though.

Highly recommended.Easy to understand, remember and apply in practice.I wish more content in the book.Helped me a lot even after one time reading.

It takes a commitment to sit and listen to the tape on successive days.It tends to fulfill its promise,but you still need to be exposed to the language frequently.

The easiest program I have used yet. It is not a huge program but it explains the basics well.

The way this book is organized is simple and effective.I bought this over whispernet in the airport before a 7 month trip to S.America and it helped me out.It obviously has examples for medical professionals, but it also helped me as someone who just didn't have any Spanish under my belt.Worth a lookover for people who have little to no Spanish knowledge.For those of you who can communicate on a basic level, this book is probably too low a level for you.
