This series is amazing! Our daughter (6) is homeschooled, and these books have been so wonderful for her. I'm amazed at her ability to remember such advanced vocabulary. The way the words are broken down phonetically is helping her learn to read words that I couldn't even pronounce until now, and our two-year-old loves the illustrations. I've even caught our daughter teaching him words from the book, which he repeats proudly all day long. I would recommend this series to everyone.

Great for little minds to start learning science.

Love the series!!! Wanted to save some \$\$ in buying 5 in 1. The binding is not the best. I fear I will be taping it back together before we finish every subject. A A A"

This is such a great book!! I think it is brilliant. The format and illustrations are simple enough but not too simple. My seven-year-old son enjoys reading. My son sounds like Sheldon from 'Big Bang Theory.' It took me awhile to find a book that was age appropriate to explain basic science concepts. This book is perfect.

Love this series! I started reading these to my son 3 years ago & he still enjoys them & learns new information as he ages. Great investment!
