Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

As a freelancer who has written for children's magazines for 19 years, I've had the challenge of introducing young readers to a wide range of topics and the thrill of hooking their attention with writing that's both educational and entertaining. For Boys' Life and National Geographic Kids, I've covered everything from ancient Greek myths to the secrets behind Star Wars, funny money facts to amazing animal pals. Several of my stories are included in the 2010-2015 editions of the National Geographic Kids Almanac and National Geographic Kids 125 True Stories of Amazing Animals. I am the author of Weather and Seed to Plant, both Level 1 National Geographic Readers. I also am the chief writer of Angry Birds Explore the World, a 96-page special issue of National Geographic Kids.

I love these books. I'm constantly looking for interesting nonfiction texts for my classroom. These are perfect for my third graders and they can not get enough of them. Kids are constantly coming up to me and telling me new facts that they have learned from the books in this series. Great for science, reading, social studies, history, vocabulary, etc. Highly recommended!

Beautiful book! I teach on an island in the BWI so my students' have more knowledge than most about coral reefs. This book is an excellent companion to what they already know!

I bought National Geographic Coral Reefs for the color of the Reefs and Fish to paint. I just finished a painting and I'm very pleased on how it turned out. thanks to the book. Mr. Sandy Satullo

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

Great books for kids.

Always love the National Geographic books.....good gift for a school classroom.

The kids love it.

Great classroom resource for teaching informational writing.
