Customer Reviews

This is in regards to the book available for purchase NEW. It is not the original text from JR Miller. It's a reproduction and the language has changed. It was disheartening to get this copy and be let down from what all the positive reviews were saying. I returned and plan on purchasing this book used. There is no where in the description that this was not the original text and no where was it said a reproduction with adaptation. The other thing I do NOT like, there is no index or page numbers. This looks like it was produced for electronic usage. However wrote the new version, did a poor job.

First, I must admit that I love classical literature and so, to me, the language and prose used in this book are simply beautiful. More importantly though, the message is as ever applicable today as it was in the 1880s. Miller articulates the role each member has in the making of the home and while some may suggest the message no longer applies today, nothing could be further from the truth! Home-making is a lost art in today's society and revisiting its merits will do nothing but enhance the lives of our innocent children and the livelihood of the larger society.

Superb! Older fashioned but this book if read and taken to heart and lived out could drastically change our homes, relationships, and etc for the better. I plan to give this as a gift to young married couples.

Simply no better writer than J.R. Miller! Probably one of, if not my favorite writer. A century after his death, his writings are still valid, and needed. Maybe more now than when he wrote them. I bought a copy of this book for both of our daughters. ALL of his books are worth reading, and digesting! Thanks for this re-publication.

This is a very timely, wise book of reflection and advice for marriage and parenting. Amazing that it was written so long ago, but applies maybe even more so today than it did when first published. Love this.

Home-Making is such an eloquent, endearing gem in these modern times. I have just purchased my second copy. The first copy was actually stolen, it is that good! It describes what each family members contribution of love is. Every one should read it. It makes a beautiful gift to any one. All my children will own it someday. It teaches, poetically, what is truly required of the heart of a person, what love really is, the expression of love, and the bonds of love. It would make a great hope chest gift. There are so many people that do not truly know what love is. They are still looking for that special, missing gift in their life. This book will redirect you on to that beautiful path!

I have purchased 3 of this book and given them all away - two for wedding showers and one for my daughter's hope chest. It is a wholesome and biblically-based treatise for the centrality of home in a woman's life and focus. J.R. Miller does an excellent job at extolling the virtues of homemaking in a way that draws young women's hearts - sometimes challenged by the outward call of the culture- to whole-hearted preparation of the sanctuary of home for their families. Older women can be

rekindled in their passion for their families and serving them in the God-honored position as mother and wife.

This book is amazingly good. The Theology is great, and it comes from a tender-hearted pastor who appears to be a loving and gracious man.
