Favorite Wildflowers Coloring Book (Dover Nature Coloring Book)

Synopsis

Among nature's perennial delights are the multihued wildflowers that grace field and forest, roadside and riverbank with their uncultivated beauty. Dazzling in their variety of form and color, they offer a true garden of earthly delights â" pleasing to the eye and comforting to the spirit. Now lovers of wildflowers can color a bouquet of floral favorites in this charming book. In detailed, accurate drawings, nature illustrator Ilil Arbel has rendered 44 familiar wildflowers: yellow flag, downy lobelia, bittersweet nightshade, wild hyacinth, spring beauty, bunchberry, fringed gentian, showy evening primrose, mayapple, common yarrow, showy tick trefoil, wild bleeding heart, ivy-leaved morning glory, meadow rose, yellow iris, globe thistle, wild calla, desert marigold, and many more. Each flower is shown in color on the covers. In addition, captions give plants' height, coloring, common and botanical names, and other information. The result is an informative guide that offers not only hours of coloring enjoyment but also an excellent way for flower lovers to learn to recognize and identify many species. Favorite Wildflowers Coloring Book also represents a fine source of royalty-free illustrations for artists and craftspeople.

Age Range: 8 - 14 years

Grade Level: 3 - 8

Customer Reviews

I've been coloring my whole life, both for pleasure and to decompress after a bad day at work.

Coloring for adults to relax has been promoted recently, as though it's a novel idea- even though many of us have been doing it for decades lol! I've seen some of those coloring books for 'grownups', and they're all boring and ugly. There's plenty of good ones around, always has been. I especially liked this one. I love wildflowers and often go scouting for ones to add to my list, just like bird watchers do. So I was really happy to run across this one!

Drawings are nice, but I was disappointed that the pictures are on both sides. I prefer using markers over pencils. If you prefer pencils, then this might be a great book for you. Especially if you want to learn about wildflowers. There are images (in color) of each picture, inside the cover.

Beautifully detailed renditions of 44 wildflowers with a coloring page for each. A great way to pique the interest of children and enable them to begin to identify common wildflowers. The write-ups on each page provide a good deal of information on where the plant can be found and when it blooms, and mentions those that are edible and nutritious and others that are poisonous. Great information for us all.

I got 7 of these books and love coloring them. You can get really creative. I don't have an artist's talent, so I enjoy creating my own color combinations, although there are colored pictures of all of them on the covers so you can follow those or come up with your own. These aren't not kids coloring books! They are more detailed, and I use colored pencils on some, fine point gel pens on others and a wide range of felt tip colors on most. I usually do these in the evening when I need to wind down and they work wonders for me. Even without artistic talent, I love my renderings.

I really enjoy coloring in this book as a gardener and true flower lover. Good gift for environmentalist and people who want to learn about flowers. Many friends have commented they like a coloring book that is more than just designs. Many color with their children and grandchildren to learn about flowers.

This is the perfect gift for any botanist. I especially like the small colored flowers which appear on the cover, because the pictures are accurate representations of how the plants grow in nature, so you can follow this guide on the full sized coloring pages, or use your imagination.

I wanted to use markers but there are pics on both sides. I really love it though. I will use my colored

pencils instead.

the bad is pics. back and front pages, wrinkles very easily, paper thin. The drawings are wonderful, detailed, informative
